Person(s) authorized to pick child up:

Name: _____ Phone: _____

Name: _____ Phone: _____

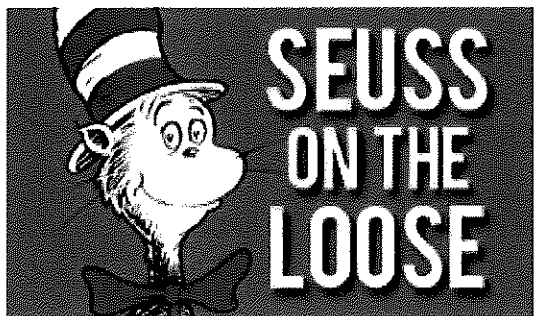

Name: _____ Phone: _____

Child's allergies: _____

Note: Minimum/Maximum number of participants required for each session.

Kids First

Summer 2022

Oh me, oh my! He's a silly goose!
Who is this guy? It must be Dr. Seuss
That's right; Dr. Seuss is on the loose at
our summer camps at Kids First! Each
session is inspired by a Seussantional
book!

Two Week Sessions:

Tues./Wed./Thurs.

May 31 - June 9

June 14-23

June 28 - July 7

July 12-21

July 26 - Aug. 4

9:00 a.m. - 1:00 p.m.

One Fish, Two Fish 5/31-6/9

Red fish, blue fish? It's your wish! In this
bubbling, floating summer camp, your child will
dive into the world of oceans. Each day will be
filled with art, crafts, and experiments. Of course,
because it's Dr. Seuss, we can't help but to sneak
in a few activities for the brain to grow. Kids will
learn about the fun of rhyming words! Come on,
don't miss the ship! Set sail with us to find out
what makes a boat float, what animals are in the
ocean, how to create an under-water viewer, and
so much more!

Bartholomew and the Oobleck 6/14-23

Bartholomew Cubbins is one of our favorite Dr.
Seuss characters. We will create our very own
shenanigans and experiments! Join the magic
this camp and find the secrets of our science lab.
Campers will make the ever-popular goo, learn
about how our weather forms and changes, and
make loads of other messy experiments.

The Foot Book 6/28-7/7

You're never too young to become a doctor! In
this exciting camp, campers will learn all about the
incredible human body. From beating hearts and
pumping lungs: to eyesight and hearing; your
young doctor will be an expert in all things about
the human body! We'll construct models of our
hearts and lungs, and even our ears and so much
more! Don't skip a (heart)beat, journey with us
through the incredible, amazing body!

If I Ran the Zoo 7/12-21

If you ran the zoo, what would you do? Would
you, could you; clean and feed? Would you,
could you; rake and weed? During this camp,
campers will play games, conduct experiments,
learn about why we have zoos, what animals are
in zoos, and what jobs they can do. We will even
have a visit from some of our favorite zookeepers
and animals! Be wild, explore with us and see
what kind of monkey business we can get into!

Green Eggs & Ham 7/26 - 8/4

Come see what fun we're cooking up in the most
delicious camp of summer! Throw on your chef's
hat and apron and join us as we discover the
science behind cooking! Experiment with baking
and cooking and learn about the many physical
and chemical changes happening within your
food. You will even taste your creations at the end
of each experiment!
